

## funtoot releases V6.0, the smartest one till date

**15/4/2016, Bangalore:** funtoot, a Bangalore based Edutech startup that provides personalized learning for Maths & Science subjects to school & home has released their latest version, **funtoot 6.0**. The new update will not only help teachers & school but will also empower parents who use **funtoot** to teach their kids at home. Releasing a brand new version 6.0 for Math & Science, **funtoot** has raised the standards of personalized learning by adding several new features to enhance the unique learning experience for every child.

The new upgrade comes with:

**Teacher's Manual & SMART Test:** Teachers can now conduct tests and exams on **funtoot** and get instant results using **funtoot's** latest test feature. Manual test allows the teacher to select her own questions whereas Smart test builds the entire test automatically based on her criterion with minimum intervention.

**Topic Progress Report (New Report):** Apart from Curriculum Progress (Class View & Student View), Learning Gaps (Class View & Student View), Revision and Test Reports, teachers now have access to a new report - Topic Progress Report that allows them to view their student's progress against a chosen topic with additional details like Questions Attempted & Solved and Time Spent.

**Active & Inactive Students in Reports:** Teachers can now differentiate between active and inactive **funtoot** using students within a stipulated time period in their reports.

**Consolidated Report:** Teachers can now download a consolidated report encapsulating student's overall **funtoot** usage across problems, revision, test and games as well as LG committed and resolved with additional parameters like Time Spent, number of CCLP interventions etc.

**Certificate of Completion:** Parents now get a **funtoot** certified learner certificate in their mail when their registered **funtoot** child completes all topics and sub-topics of **funtoot**.

**Google+ and Facebook Signup/Login Integration:** Parents can now signup and login to **funtoot** using their existing social media accounts

**Creating Revisions for their child:** Paid subscriber parents can create revisions before exams across topics and sub-topics for their child

"We have been working on these upgrades after taking feedback from our current base of users. Our focus remains on developing & delivering innovative tools for teachers & parents to teach children effectively," Said Mr. Rajeev Pathak, founder & CEO of **funtoot**. "The new upgrade has something for all our stakeholders, which include Teachers, parents & students. We are about to hit our 1<sup>st</sup> benchmark of

1 Lakh students in few more days. We believe that the new features will enhance the user experience to the next level.”

**About funtoot:** funtoot is a personalized digital learning coach which behaves like an experienced tutor and guides the child through a unique learning journey for higher achievements. 75,000+ students across India have been actively using funtoot and benefiting by the personalized attention funtoot provides to them in learning Maths & Science. funtoot is available for students in class 2nd to 9th for ICSE & CBSE curriculum in India.
